

## **Antistatic Slipper 2005 Series**

### **Materials**

---

Black Sole : Made from EVA

---

Blue Vamp : Made from PVC

---

### **Design and Feature**

---

- Antistatic Slipper is made of soft & comfort durability & flexibility. The sole is thick enough to protect base board from static and make sure the static can conduct to the earth.
- The antistatic property makes static discharges to dissipative via the sole for those who are on the move in factory environment with ease.
- It is also design with base that minimizes dirt trapping.

### **Colour**

---

Black Sole with Blue Vamp

---

### **Application**

---

Suitable for industry that involved Microelectronics assembly and Packing where static control is a concern. The material and design also helps to control dirt contamination.

### **ESD Properties**

---

Body to Ground Resistance : 2.17 E6 Ohms/sq

---

Surface Resistance : E6 Ohm

---

**Size Available**

Product Code	Size
2005-0035	230 (S)
2005-0036	240 (M)
2005-0037	250 (L)
2005-0038	260 (XL)
2005-0039	270 (2XL)
2005-0040	280 (3XL)
2005-0041	290 (4XL)
2005-0042	300 (5XL)
