Properties

Polyurethane coated in the palm, providing a super grip and abrasion resistance, and protects hands from acid and chemical residue.

Urethane coating is also non-slip, and facilitates delicate assembly work.

The backs of the gloves are not coated, allowing the hands to breathe thus minimizing clamminess and sweating. Protects the handled products from sweat and dust.

Low lint and seamless, provide optimum comfort and dexterity.

Applications

Delicate and precise operations such as assembly jobs with electronics, semiconductors, micro-processors and compact disks.

General assembly, component handling and light engineering work Maintenance or micro-mechanical tasks

Pharmaceutical processing, agriculture and gardening.
