

## PAN-750 Anemometer

The Prostat PAN-750 Anemometer is a battery operated instrument used to measure air velocities and temperature of ionizers. This instrument can also be used to measure wind velocities and check air conditioning and heating systems. This portable anemometer provides fast, accurate readings with digital readability and the convenience of a remote sensor. It provides simultaneous display of air velocity and temperature.

Its large 1.4 inch (1999 count) LCD display has a contrast adjustment. The PAN-750 provides several operational features such as "Data

Hold", Record, Recall MIN/MAX measurements, and selection of °F or °C. It comes equipped with a heavy-duty rubber holster with stand for easy operation. One 9 Volts battery is supplied.
