

PRODUCT INFORMATION

Product Description	Wrist Strap Tester Oriteq 894-1
Product Code	4005-0011
Model No.	Oriteq 894-1
Warranty	1 year

PRODUCT DESCRIPTION

The Wrist Strap System Test is designed to permit a fast, simple, safe and convenient means to test the total integrity of static dissipative wrist strap systems. All the elements of a wrist strap system, continuity of the strap, integrity of the strap protective resistor and satisfactory strap-to-skin contact are confirmed by depressing the top cover of the tester.

PRODUCT FEATURES

- Unit checks operator, wrist strap's contact to skin, wrist strap's resistor and ground connection in one fast, convenient, simple and safe touch operation.
- An audible tone and green light indicate the wrist strap system (i.e. > person, strap, and ground connection) is effectively dissipating charge.
- An amber light indicates resistance is too high (greater than 35M) to dissipate charges satisfactory within desired time limits
- A red light indicates resistance is less than 800k at its lower limit, indicating a possible to ground.
- Low light levels or no tone indicate to a faulty or weak battery.

TECHNICAL SPECIFICATION

Description	Specifications
Power	9 V Battery
Test Voltage	7.6 V Nominal
Resistance Specification	750 K - 100 Meg
Dimensions	10 cm x 6 cm x 2.7 cm
